

“Enhancing Climate Resilience of Forests and its Dependent Communities in Two Landscapes of Jharkhand”

The project aims to undertake capacity building of the forest dependent communities, undertake construction of contour trench, gully plugging for soil & moisture conservation works, water harvesting, promote gender sensitive and climate resilient livelihood systems. For promoting energy use-efficiency and alternative energy, cook stoves, gohar gas plants, solar lamps/lights and kitchen garden would be promoted. Project would be implemented in 48 villages of Patratu block of Ramgarh district and Narayanpur block of Jamtara district of Jharkhand. The project is expected to benefit 48 Villages of the Project Locations. The project would be executed by Department of Forest, Government of Jharkhand with a NAFCC grant assistance of Rs. 24.99 Crore.
