

**Expression of Interest (EoI) for
“Procurement of Data Analytics Software” - Response to pre-bid queries**

Section	Page No	Clause	Bidder query	Response
SECTION I	4	Pre-Integrity Pact on Rs.200/- stamp paper as per the format in this bid document as given in Annexure-III.	As stamp papers are available at a denominations of Rs.50 and 100. Shall we use two 100 rs stamp papers for the execution of the Annexure.	Yes
SECTION III - SCOPE OF WORK	8	Conducting online/ physical training for multiple batches covering one cycle of different user groups.	Please advise us on the No. Of users for training.	`
SECTION III - SCOPE OF WORK	8	Conducting online/ physical training for multiple batches covering one cycle of different user groups.	Training will be post-delivery of the migration. Please confirm	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
SECTION III - SCOPE OF WORK	8	Supply, install, and commission the software and provide licences within 30 days from the date of issue of the contract order. Migrate the existing reports, dashboards and Analytical Use Cases (AUCs) developed in Power BI within six months from the date of issue of the contract order.	The migration activity time line will be 6 months post license commissioning. Kindly confirm.	As per the revision through corrigendum
SECTION IV – BIDDER'S ELIGIBILITY CRITERIA	10	The primary bidder should have 24*7 offsite support.	In page no. 31 , 23 noticed onsite support is required . Kindly clarify its on oniste supprt or offsite support in business hours.	As per the revision through corrigendum
ANNEXURE-VIII	33	140 reports	Any additional new reports to be developed along with migrated dashboards. Please specify the count if any.	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
SECTION III - SCOPE OF WORK	8	General Delivery Variables Delivery of the Data Analytics software with licenses for approx. 2500 developers-cum-users for a period of five years. Alternatively, if the software is offered on core-based licences, licenses for 16 core may be offered.	Does the Bank currently have an existing data warehouse environment? If yes, please provide: 1. The database(s) used within the data warehouse (e.g., Oracle, SQL Server, Snowflake, etc.). 2. The ETL tool(s) currently being utilized. Could you specify the total number and types of source systems integrated with the data warehouse (e.g., Core Banking System, ERP, CRM, third-party applications)? Are there any specific data models or schemas (e.g., star or snowflake schema) followed in the current setup?	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
SECTION III - SCOPE OF WORK	8	Migrate the existing reports and dashboards developed in Power BI to the new software commissioned.	Will the selected bidder have access to existing ETL workflows and transformation logic for seamless integration and migration?	Yes
SECTION III - SCOPE OF WORK	8	General Delivery Variables In-house consulting services for specific business needs.	Could you provide more details on the scope of the in-house consulting services mentioned? Specifically: <input type="checkbox"/> Will the consulting services be required on the functional side, technical side, or both? <input type="checkbox"/> Will the consultants be expected to develop and implement solutions (e.g., dashboards, reports, workflows), or will the role be limited to advisory/consulting? <input type="checkbox"/> What will be the nature of the engagement—on-demand (as needed), full-time, or periodic (e.g., monthly/quarterly)? <input type="checkbox"/> Are there any expectations regarding the number of consultants or skillsets (e.g., data scientists, ETL developers, business analysts) required? <input type="checkbox"/> Will the consulting team work remotely, on-site, or a combination of both? <input type="checkbox"/> Is there a timeline or frequency of consulting activities already defined (e.g., during specific project phases)?	1. Both 2. Yes, development and implementation both 3. It will be need basis 4. It will be need basis 5. Team can work in combination of both on-site/ remote 6. It will be need basis
SECTION III - SCOPE OF WORK	8	Software Installation and Navigation Software that come bundled with a mobile app (for both android and iOS) would be preferred.	When referring to software bundled with a mobile app (for both Android and iOS): <input type="checkbox"/> Is the expectation that reports and dashboards should be accessible via mobile devices? <input type="checkbox"/> Does the Bank currently have mobile accessibility for reports and dashboards, or will this functionality need to be developed from scratch? <input type="checkbox"/> Are there any specific mobile features required, such as offline access, push notifications, or biometric login? <input type="checkbox"/> Will the Bank expect the mobile app to offer native functionalities (developed specifically for Android/iOS), or is a responsive web application acceptable? <input type="checkbox"/> Will the bidder need to customize the mobile app to meet specific Bank requirements, or is an off-the-shelf solution preferred?	Yes. Further details shall be shared with the shortlisted bidders before Proposal for Commercials

SECTION III - SCOPE OF WORK	8	Interconnectivity and Compatibility Ability for integrating the software through customisable Application Programming Interfaces (APIs), embedding options.	<p>Could you provide more details on where the integration using customizable APIs and embedding options is expected? Specifically:</p> <p>What are some examples or details of the target systems (e.g., Core Banking Systems, ERPs, CRMs, Payment Gateways) that need to be integrated with the software?</p> <p>Are there any third-party applications or external data sources that require API-based integration?</p> <p>Will the software need to embed dashboards or analytics modules into other applications (e.g., internal portals, intranets)?</p> <p>Are there specific API formats or standards (e.g., REST, SOAP) preferred by the Bank?</p> <p>Will there be a need for real-time data synchronization, or will batch-based integration be sufficient?</p>	Further details shall be shared with the shortlisted bidders before Proposal for Commercials
Additional Clarification		Clarification on Disaster Recovery (DR), RTO, and RPO Requirements:	<p>Could you confirm whether disaster recovery (DR) for the application is required as part of this project? <input type="checkbox"/></p> <p><input type="checkbox"/> Yes, will a DR environment need to be set up by the bidder, or does the Bank already have an existing DR infrastructure?</p> <p>What are the specific Recovery Time Objective (RTO) and Recovery Point Objective (RPO) expectations for the application? <input type="checkbox"/></p> <p><input type="checkbox"/> Is the data warehouse database currently equipped with a DR setup?</p>	Installation and configuration of the software is to be done in DR. Details shall be shared with the successful bidder
		Data Size, Type, Growth	<p>Could you confirm following regarding the data:-</p> <p>What is total size of data currently that the data analytics solution will be handling.</p> <p>Can we bifurcate this into structured data, unstructured data, semi-structured data?</p> <p>What is the rate of growth expected for next 5 years for all types of data?</p>	Details shall be shared with the successful bidder
SECTION I	4	Pre-Integrity Pact on Rs.200/- stamp paper as per the format in this bid document as given in Annexure-III.	As stamp papers are available at a denominations of Rs.50 and 100. Shall we use two 100 rs stamp papers for the execution of the Annexure.	Yes
SECTION III - SCOPE OF WORK	8	Conducting online/ physical training for multiple batches covering one cycle of different user groups.	Please advise us on the No. Of users for training.	Details shall be shared with the successful bidder
SECTION III - SCOPE OF WORK	8	Conducting online/ physical training for multiple batches covering one cycle of different user groups.	Training will be post-delivery of the migration. Please confirm	Details shall be shared with the successful bidder
SECTION III - SCOPE OF WORK	8	Supply, install, and commission the software and provide licences within 30 days from the date of issue of the contract order. Migrate the existing reports, dashboards and Analytical Use Cases (AUCs) developed in Power BI within six months from the date of issue of the contract order.	The migration activity time line will be 6 months post license commissioning. Kindly confirm.	As per the revision through corrigendum
SECTION IV – BIDDER'S ELIGIBILITY CRITERIA	10	The primary bidder should have 24*7 offsite support.	In page no. 31, 23 noticed onsite support is required. Kindly clarify its on onsite support or offsite support in business hours.	As per the revision through corrigendum
ANNEXURE-VIII	33	140 reports	Any additional new reports to be developed along with migrated dashboards. Please specify the count if any.	Further details shall be shared with the shortlisted bidders before Proposal for Commercials
SECTION II – SCHEDULE OF EVENTS	5	Date and time of Pre-bid meeting (Physical Meeting)	Request to make it as an Online Meeting. We are Bengaluru based Product Startup. Physical Meeting is inconvenience to number of participants like us. Currently number of banks and Govt departments use Video Conferencing solutions widely in such Pre Bid Meetings. It helps more participation from across the country including companies from Tier 3 cities.	Yes- Meeting link already sent
SECTION IV – BIDDER'S ELIGIBILITY CRITERIA	10	The bidder should have net profit in at least two financial years during last three audited financial years. The net worth of the Bidder should be positive as at the end of the 31 March 2024 based on the audited financial statements. A certificate to this effect duly signed by the Auditor of the bidder shall be submitted.	Request to extend Exemptions to the product Startup as per the Guidelines of Ministry of Finance.	As per the revision through corrigendum
SECTION IV – BIDDER'S ELIGIBILITY CRITERIA	10	The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI (Banking, Financial Services, and Insurance) Sector, within the past 3 Financial Years.	Request to extend Exemptions to the Startup as per the Guidelines of Ministry of Finance. We request NABARD to consider Proof of Concept from the Startup to demonstrate the Platform capabilities.	As per the revision through corrigendum

ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	29	Integration with multiple sources systems/ applications	Data Sources and Integration 1.)What are the key data sources to be considered in the scope (e.g., Oracle, SQL Server, core banking systems, third-party APIs)? 2.)Do any of these data sources require real-time or near-real-time integration for the new platform? 3.)Can you provide details on the total volume of historical data that will be involved in the migration (e.g., size of datasets in GB/TB)? 4.)What is the average daily data generation rate (in terms of rows, records, or size) across your current underlying data sources? 5.)What is the expected growth rate of data over the next 1–3 years, and how would this impact storage and processing requirements in the analytics platform?	Details shall be shared with the successful bidder
Scope of Work	7	Interconnectivity and Compatibility	Data Transformation and ETL Processes 1.)Can you provide details on the ETL processes used to prepare data for Power BI reports (e.g., tools like SSIS, Informatica, or custom ETL pipelines)? 2.)What are the specific requirements around data refresh frequency for reports? Are there daily, hourly, or real-time refresh needs?	Details shall be shared with the successful bidder
Scope of Work	7	Security and Authentication	User Access and Security 1.)How is user authentication currently managed (e.g., Azure AD, on-premise AD, SSO) for Power BI, and will this need to be integrated with the new analytics platform? 2.)Are there specific RBAC (Role-Based Access Control) or granular security requirements for sensitive financial or customer data in reports? 3.)Are there existing or planned data governance policies around data lineage, audit trails, and report versioning that need to be enforced?	1. Azure AD 2. Yes 3. Yes
Scoring methodology for Technical Evaluation	13	Methodology and approach for migration of existing Power BI reports	Current Power BI Setup and Reports 1.)How many Power BI reports/dashboards are currently in use across the bank, and what is their complexity (e.g., multi-page reports, embedded analytics, use of RLS—Row Level Security)? 2.)Can you provide a list or classification of the Power BI reports by department (e.g., finance, marketing, risk management) to assess the scope of migration for each? 3.)Are there custom visuals or advanced analytics (e.g., DAX, R scripts, or Python) used in these reports that will need to be supported in the new platform? 4.)How frequently do these users interact with Power BI (daily, weekly, real-time)? How critical are real-time analytics for day-to-day banking operations? 5.)Can you confirm whether all reports are cloud-hosted (Power BI Service) or if there is any on-premises Power BI Report Server usage that needs migration to the new platform?	Further details shall be shared with the shortlisted bidders before Proposal for Commercials
ANNEXURE-IX - REQUIRED ENVIRONMENT	34	Hardware Requirements:	Infrastructure and Performance Expectations 1.)What is the current on-premise or cloud infrastructure supporting Power BI? Are you expecting a on-premise, hybrid or fully cloud-based solution? 2.)Are there specific performance SLAs that need to be met for query response times, report loading times, or concurrent user access?	1. On-premise 2. Further details shall be shared with the shortlisted bidders before Proposal for Commercials
SECTION IV – BIDDER'S ELIGIBILITY CRITERIA	10	Make In India	Request you to incorporate Make In India criteria as part of the EOI. Ministry of Finance published circular to procure Make In India product where procurement amount is less than Rs 200Cr. Category-1 where Make in India is more than 50% will have higher weightage over Category-2 Where Make In India is more than 20%.	No change
SECTION IV – BIDDER'S ELIGIBILITY CRITERIA	10	Make In India	Kindly have the OEM's Make in India confirmation atleast CEO or Country Head of the Original Software Company.	No change
SECTION IV – BIDDER'S ELIGIBILITY CRITERIA	10	Make In India	Kindly have the OEM's development center for this Data Analytics Platform in India. A confirmation from the CEO or Country head of the organisation.	No change
General	NA	NA	List of source systems to connect with Tableau	Further details shall be shared with the shortlisted bidders before Proposal for Commercials
General	NA	NA	Is there middle layer (Data Mart/Data Warehouse) available for data transformation	Yes
Section II - Schedule of Events,	5	Last Date and Time for Expression of Interest (EOI) Submission along with all supporting documents is 04 Nov 2024 @ 5.00 pm	We request the Bank to extend the bid submission for atleast 10-15 days after the pre-bid clarification is shared.	No change

Section IV-Bidder's Eligibility Criteria	10	Average annual turnover of ₹25 crore and above for the last three Financial Years (2021-22, 2022-23 and 2023-24)	We humbly request Bank to reduce the minimum annual turnover to 10 to 15 Crores to provide relaxation to MSEs on this criterion, considering the GOI guidelines for MSEs. {Ministry of Micro, Small & Medium Enterprises (MSMEs) vide Policy Circular No. 1(2)(1)/2016-MA dated 10" March, 2016 has clarified that all Central Ministries / Departments / Central Public Sector Undertakings (CPSUs) may relax condition of prior turnover and prior experience with respect of Micro & Small Enterprises (MSEs) in all public procurements subject to meeting of quality and technical specifications.}	As per the revision through corrigendum
SECTION IV ELIGIBILITY CRITERIA	10	The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI	Restrictive criteria has been laid down as per this clause which is against Make in India OEMs or solution providers as per MSME Policy & hence, favouring only few global OEMs/MNCs to participate in the tender. We would request you to kindly relax this for MSME or amend the clause as mentioned below for larger participation. "The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI/Telecom/Manufacturing/Govt/Large Enterprises in India"	As per the revision through corrigendum
SECTION III - SCOPE OF WORK General Delivery Variables	7	Provide the ability to remotely wipe data from lost or stolen devices	Device management is generally taken care by separate 3rd party tools and is not a standard offering of Analytics Software and limits the wider participation, hence we request you to kindly remove this from the Analytics Requirement.	No change
SECTION III - SCOPE OF WORK General Delivery Variables	7	Provide certificate of conforming to the Open Worldwide Application Security Project (OWASP) standards for source code in the prescribed format.	We understand that the OWASP standards certification can be provided during supply of the licenses, kindly confirm	No change
SECTION III - SCOPE OF WORK General Delivery Variables	6	Delivery of the Data Analytics software with licenses for approx. 2500 developers-cum-users for a period of five years. Alternatively, if the software is offered on core-based licences, licenses for 16 core may be offered.	The specified licensing terms are overly restrictive and do not adequately address the comprehensive aspects necessary for a proven and effective solution. To ensure clarity and avoid any limitations or ambiguities, we request that licensing be structured with more flexibility regarding: The total number of BI/Analytics users license The total number of users license The number of integrations license and size of data to be integrated	No Change
SECTION III - SCOPE OF WORK	6	Migrate the existing reports and dashboards developed in Power BI to the new software commissioned.	Kindly confirm the below details to efficiently size the sizing, timelines and efforts for migration: 1. number of integrations required 2. size of total data 3. data retention period required 4. We understand that Power BI will expose the required open APIs for migration of existing reports, kindly confirm	Details shall be shared with the shortlisted bidders before Proposal for Commercials
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS 2 Product Features	29	2.2 Data integration	Details about existing system, data sources to be integrated size of data, retention duration are not provided, Request you o kindly provide these details to ensure respective sizing, performance and scalability along with timelines basis the efforts can be calculated efficiently.	Details shall be shared with the shortlisted bidders before Proposal for Commercials
SECTION III - SCOPE OF WORK	29	Ensure the software supports seamless interconnectivity between applications and hardware, without any limitation on data size related performance.	The current clause asks for unlimited data which is not practical in terms of solution delivery since clear data size is required to ensure optimal dimensioning, performance and sizing, hence we request to kindly provide the required data size and amend the clause accordingly to reflect the required performance expectations: "Interconnectivity and Compatibility Ensure the software supports seamless interconnectivity between applications and hardware, ensure performance and the platform should be scalable without needing architectural changes"	Details shall be shared with the shortlisted bidders before Proposal for Commercials
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	31	Be agile to support integration with existing applications and upcoming applications, along with future upgrades, through APIs/ web services etc.	Details of the existing and upcoming systems is required to ensure the proposed solution meets the efficiency, performance, scalability requirement. We request to kindly share the below necessary details to do the dimensioning, sizing and licensing: Existing app/databases/data source count, data size, number of integrations, number of upcoming apps/db/datasources along with their expected size data retention duration	Details shall be shared with the shortlisted bidders before Proposal for Commercials

SECTION III - SCOPE OF WORK	7	Implement various security measures including Single Sign-on (SSO) integration, and device authorization.	Device Authorization is a restrictive clause and should be relaxed to allow for wider participation and we request to amend the clause as below: "Implement various security measures including Single Sign-on (SSO) integration, and device authorization"	No Change
SECTION III - SCOPE OF WORK	8	Ensure secure login options and handling multiple device authorizations.	We understand that this feature is required from the mobile app, kindly confirm that this is not applicable in case the solution supports responsive web based GUI that can be accessed from any PC,workstation,Mobile, Tablet	No change
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS 1 General Features	29	Capture the device ID while logging in to the software to authorize the device.	We understand that this feature is required from the mobile app, kindly confirm that this is not applicable in case the solution supports responsive web based GUI that can be accessed from any PC,workstation,Mobile, Tablet	No Change
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS 1 General Features	29	Switch to the offline mode and still be able to use the product functionalities and all downloaded information.	We understand that this feature is required from the mobile app, kindly confirm. Additionally the requirement to use the complete functionality over mobile app in the offline mode is not feasible, since the analytics platform required central processing, hence we request you to amend the clause as follows: "The solution should have responsive web based GUI that can be accessed from any PC,workstation,Mobile, Tablet"	No Change
SECTION III - SCOPE OF WORK	8	Migrate the existing reports, dashboards and Analytical Use Cases (AUCs) developed in Power BI within six months from the date of issue of the contract order. The details of the existing Power BI reports and dashboards to be migrated are given in Annexure VIII	We understand that the migration of data has to be completed within 180 Days (06 months) and not 105 Days- Kindly confirm	As per the revision through corrigendum
SECTION III - SCOPE OF WORK	9	Migration of existing Power Bi Reports 105 days		As per the revision through corrigendum
SECTION III - SCOPE OF WORK	7	Software that come bundled with a mobile app (for both android and iOS) would be preferred.	Mobile App is not a standard requirement for an analytics solution and hence we request that the solution provider can either provide responsive web based GUI that can be accessed from any PC,workstation,Mobile, Tablet, Kindly confirm and also we request that mobile app clause be removed from QCBS evaluation	No Change
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS 2.9 Mobility	30	Accessing & interacting with the reports and dashboards on the-move. Compatible with both iOS and Android-powered mobile devices.	We recognize the need to deliver a seamless user experience through an easy-to-use access mechanism. Therefore, we request that the proposed solution should be asked with a responsive web-based GUI rather than a mobile app, as mobile apps are not standard for analytics platforms. This approach will also ensure a lower total cost of ownership for the department and eliminate concerns about data wiping or security. We kindly request the following amendment to the clause: "The solution should feature a responsive web-based GUI that is accessible from any PC, workstation, mobile device, or tablet."	No Change
SECTION III - SCOPE OF WORK	7	Provide the ability to remotely wipe data from lost or stolen devices.	We understand that this feature is required from the mobile app, kindly confirm. Additionally it is preferable to have no local data on remote devices to ensure security and without need to wipe data on lost devices, hence we request to have remove this requirement and have the below clause that meets the need to have a seamless user experience" "The solution should have responsive web based GUI that can be accessed from any PC,workstation,Mobile, Tablet"	No Change
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS Regular Updates and Enhancements	31	Provisions for regular updates and enhancements to the data analytics software to incorporate new features, improvements, and optimizations based on user feedback and evolving requirements.	We understand that the new features shall be decided basis feasibility and shall be treated as Change request over and above the current scope, kindly confirm	Yes
SECTION IV ELIGIBILITY CRITERIA	10	The primary bidder (OEM/ SI) should be a company registered in India under Company Act, 1956/ 2013 or a partnership firm/ a Limited Liability Partnership company under the Limited Liability Partnership Act, 2008 with average annual turnover of ₹25 crore and above for the last three FYs (2021-22, 2022-23 and 2023-24)	Will the Fintech companies allowed to participate in the tender process, if we have participated in the empanelment process for any new software development projects with NABARD?	Minimum eligibility criteria norms to be complied with
SECTION IV ELIGIBILITY CRITERIA	10	The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI(Banking, Financial Services, and Insurance) Sector, within the past 3 Financial Years.	Will there be exemption provided for MSME bidders for the experience criteria	No

Section IV -Eligibility Criteria	3	The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI (Banking, Financial Services, and Insurance) Sector, within the past 3 Financial Years.	As data analytics software is a horizontal solution that is deployed across all industries, the bidder request the following clause to be incorporated: A. The software proposed by primary bidder should have been in the industry for a minimum of 5 years and B. The primary bidder should have implemented the proposed data analytics software in atleast 1 BFSI/Govt organisation/PSU in the last 3 years. C. Additionally, the primary bidder or its OEM to submit 2 client references where the proposed software has been implemented in BFSI within 5 financial years. (OEM implementation Purchase order can be submitted in this case if the primary bidder does not have the direct experience)	As per the revision through corrigendum
Section IV -Eligibility Criteria	3	The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI (Banking, Financial Services, and Insurance) Sector, within the past 3 Financial Years.	As data analytics software is a horizontal solution that is deployed across all industries, the bidder request the following clause to be incorporated: A. The software proposed by primary bidder should have been in the industry for a minimum of 5 years and B. The primary bidder should have implemented the proposed data analytics software in atleast 1 BFSI/Govt organisation/PSU in the last 3 years. C. Additionally, the primary bidder to submit 2 client references where similar data analytics software has been implemented in BFSI/govt. organisation/ PSU within 5 financial years	As per the revision through corrigendum
Section IV -Eligibility Criteria	2	Relevant Purchase orders, clearly indicating the scope and value of the contract, with client references and contact details.	Bidder to submit Purchase order mentioning the type of data analytics License supplied with high level BOQ. (Value of the contract is sensitive information hence the same cannot be provided)	No Change
Section VII - Terms and c onditions	17	NABARD reserves the right to inspect the facilities of the bidder any time during the evaluation stage to verify the genuineness and to ensure the conformity with the proposal submitted (and 'Independent External Monitors' in Pre-Contract Integrity Pact)	Request to delete this requirement in Section VII.We need to have certain safeguards and guardrails around audit and inspection. We can share these deviations at a later stage (ie. contracting stage).	No Change
SECTION III - SCOPE OF WORK	6	Delivery of the Data Analytics software with licenses for approx. 2500 developers-cum-users for a period of five years. Alternatively, if the software is offered on core-based licences, licenses for 16 core may be offered.	Bidder requests NABARD to confirm- 1) Breakup of developer and viewers users from the total number of users 2) Are the number of users expected to grow during the contract period?	No Change
SECTION III - SCOPE OF WORK	6	In-house consulting services for specific business needs.	Bidder requests NABARD to confirm the scope for in-house consulting services. Is it required full time or on man days basis?	Man days basis
SECTION III - SCOPE OF WORK	7	Support and Maintenance <input type="checkbox"/> Provide 24/7 call and Teams/ email support to resolve any issues promptly.	Bidder understands that the support mentioned is remote. Please confirm.	As per the revision through corrigendum
SECTION III - SCOPE OF WORK	7	Provide the ability to remotely wipe data from lost or stolen devices.	Bidder understands that NABARD has Mobile Device Management for handling security related requirements.	Yes
SECTION-V QCBS EVALUATION CRITERIA	14	N Vendor is providing both perpetual and subscription-based pricing models	Bidder requests NABARD to allow either perpetual or subscription pricing model.	Bidder can provide their preferred pricing model as per the prescribed format
ANNEXURE-V – PROJECT DETAILS	28	7. Contract Amount (Rs. lakh) Mandatory- Y	Bidder requests NABARD to remove the contract amount as a mandatory ask since we sign NDA with the clients.	No Change
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	29	2.1 Data mining	Bidder requests NABARD to confirm the data refresh frequency. (E.g.Once/ Twice in day)	Details shall be provided to the successful bidder
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	29	2.2 Data integration	Bidder requests NABARD to confirm- 1) What are the specific sources databases types? 2) Relevant analytics ready data volume for Dashboarding and reporting layer (in MBs/GBs)	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	29	2.3 Visualization Types	Bidder requests NABARD to confirm whether the software should have specific capabilities for suggesting visualization types based on data sets, or will predefined visualization templates suffice?	Criteria is to provide the functionality as per the business requirements
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	29	2.4 User-Friendly Interface	Bidder understands that complete browser based access and single user interface for development and viewer both is required as part of scope. Please confirm.	Yes
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	29	2.4 User-Friendly Interface	Bidder requests NABARD to confirm the level of self service required.	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	29	2.5 Automated Reporting Scheduled generation and distribution of reports.	Bidder requests NABARD to confirm- 1) How many reports are required to be automated? 2) What is the frequency (Daily/monthly/Weekly) of reports?	Details furnished in Annexure VIII on page 33; Further details shall be provided to the successful bidder
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	29	2.5 Automated Reporting	Bidder requests NABARD to confirm the how many months or periods of data is required in dashboards and reporting?	Details shall be provided to the successful bidder

ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	29	2.9 Mobility	Bidder understands that NABARD requires online and offline accessibility of dashboards on Mobile Application, please confirm.	Yes
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	31	User Management 3.2 Add user profiles	Bidder requests NABARD to provide details of different user personas (e.g., Analyst, Manager, Executive) with specific feature access requirements and typical usage scenarios.	Details shall be provided to the shortlisted bidders before Proposal for Commercials
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	31	4 Additional Services- In-house consulting services for specific business needs such as migration of existing dashboards/ Reports.	Bidder requests NABARD to confirm the number of mandays required for in-house consulting services. Is resource expected to be available as per requirement or full time?	Details shall be provided to the shortlisted bidders before Proposal for Commercials
ANNEXURE-VIII - DETAILS OF EXISTING POWER BI REPORTS TO BE MIGRATED	33	NA	Considering the volume of high complexity AUC and dashboards, we request NABARD to increase the implementation timeline by additional 30 days.	No change
SECTION IV ELIGIBILITY CRITERIA	10	The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI	Restrictive criteria has been laid down as per this clause which is against Make in India OEMs or solution providers as per MSME Policy & hence, favouring only few global OEMs/MNCs to participate in the tender. We would request you to kindly relax this for MSME or amend the clause as mentioned below for larger participation. "The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI/Telecom/Manufacturing/Govt/Large Enterprises in India"	As per the revision through corrigendum
SECTION III - SCOPE OF WORK General Delivery Variables	7	Provide the ability to remotely wipe data from lost or stolen devices	Device management is generally taken care by separate 3rd party tools and is not a standard offering of Analytics Software and limits the wider participation, hence we request you to kindly remove this from the Analytics Requirement.	No change
SECTION III - SCOPE OF WORK General Delivery Variables	7	Provide certificate of conforming to the Open Worldwide Application Security Project (OWASP) standards for source code in the prescribed format.	We understand that the OWASP standards certification can be provided during supply of the licenses, kindly confirm	No change
SECTION III - SCOPE OF WORK General Delivery Variables	6	Delivery of the Data Analytics software with licenses for approx. 2500 developers-cum-users for a period of five years. Alternatively, if the software is offered on core-based licences, licenses for 16 core may be offered.	The specified licensing terms are overly restrictive and do not adequately address the comprehensive aspects necessary for a proven and effective solution. To ensure clarity and avoid any limitations or ambiguities, we request that licensing be structured with more flexibility regarding: The total number of BI/Analytics users license The total number of users license The number of integrations license and size of data to be integrated	No Change
SECTION III - SCOPE OF WORK	6	Migrate the existing reports and dashboards developed in Power BI to the new software commissioned.	Kindly confirm the below details to efficiently size the sizing, timelines and efforts for migration: 1. number of integrations required 2. size of total data 3. data retention period required 4. We understand that Power BI will expose the required open APIs for migration of existing reports, kindly confirm	Details shall be provided to the shortlisted bidders before Proposal for Commercials
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS 2 Product Features	29	2.2 Data integration	Details about existing system, data sources to be integrated size of data, retention duration are not provided, Request you o kindly provide these details to ensure respective sizing, performance and scalability along with timelines basis the efforts can be calculated efficiently.	Details shall be provided to the shortlisted bidders before Proposal for Commercials
SECTION III - SCOPE OF WORK	29	Interconnectivity and Compatibility Ensure the software supports seamless interconnectivity between applications and hardware, without any limitation on data size related performance.	The current clause asks for unlimited data which is not practical in terms of solution delivery since clear data size is required to ensure optimal dimensioning, performance and sizing, hence we request to kindly provide the required data size and amend the clause accordingly to reflect the required performance expectations: "Interconnectivity and Compatibility Ensure the software supports seamless interconnectivity between applications and hardware, ensure performance and the platform should be scalable without needing architectural changes"	No change
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS	31	Be agile to support integration with existing applications and upcoming applications, along with future upgrades, through APIs/ web services etc.	Details of the existing and upcoming systems is required to ensure the proposed solution meets the efficiency, performance, scalability requirement. We request to kindly share the below necessary details to do the dimensioning, sizing and licensing: Existing app/databases/data source count, data size, number of integrations, number of upcoming apps/db/datasources along with their expected size data retention duration	Details shall be provided to the shortlisted bidders before Proposal for Commercials

SECTION III - SCOPE OF WORK	7	Implement various security measures including Single Sign-on (SSO) integration, and device authorization.	Device Authorization is a restrictive clause and should be relaxed to allow for wider participation and we request to amend the clause as below: "Implement various security measures including Single Sign-on (SSO) integration, and device authorization"	No Change
SECTION III - SCOPE OF WORK	8	Ensure secure login options and handling multiple device authorizations.	We understand that this feature is required from the mobile app, kindly confirm that this is not applicable in case the solution supports responsive web based GUI that can be accessed from any PC,workstation,Mobile, Tablet	No change
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS 1 General Features	29	Capture the device ID while logging in to the software to authorize the device.	We understand that this feature is required from the mobile app, kindly confirm that this is not applicable in case the solution supports responsive web based GUI that can be accessed from any PC,workstation,Mobile, Tablet	No Change
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS 1 General Features	29	Online/ Offline status 1.1 Switch to the offline mode and still be able to use the product functionalities and all downloaded information.	We understand that this feature is required from the mobile app, kindly confirm. Additionally the requirement to use the complete functionality over mobile app in the offline mode is not feasible, since the analytics platform required central processing, hence we request you to amend the clause as follows: "The solution should have responsive web based GUI that can be accessed from any PC,workstation,Mobile, Tablet"	No Change
SECTION III - SCOPE OF WORK	8	Migrate the existing reports, dashboards and Analytical Use Cases (AUCs) developed in Power BI within six months from the date of issue of the contract order. The details of the existing Power BI reports and dashboards to be migrated are given in Annexure VIII	We understand that the migration of data has to be completed within 180 Days (06 months) and not 105 Days- Kindly confirm	As per the revision through corrigendum
SECTION III - SCOPE OF WORK	9	Migration of existing Power Bi Reports 105 days		As per the revision through corrigendum
SECTION III - SCOPE OF WORK	7	Software that come bundled with a mobile app (for both android and iOS) would be preferred.	Mobile App is not a standard requirement for an analytics solution and hence we request that the solution provider can either provide responsive web based GUI that can be accessed from any PC,workstation,Mobile, Tablet, Kindly confirm and also we request that mobile app clause be removed from QCBS evaluation	No Change
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS 2.9 Mobility	29	Accessing & interacting with the reports and dashboards on the-move. Compatible with both iOS and Android-powered mobile devices.	We recognize the need to deliver a seamless user experience through an easy-to-use access mechanism. Therefore, we request that the proposed solution should be asked with a responsive web-based GUI rather than a mobile app, as mobile apps are not standard for analytics platforms. This approach will also ensure a lower total cost of ownership for the department and eliminate concerns about data wiping or security. We kindly request the following amendment to the clause: "The solution should feature a responsive web-based GUI that is accessible from any PC, workstation, mobile device, or tablet."	No Change
SECTION III - SCOPE OF WORK	7	Provide the ability to remotely wipe data from lost or stolen devices.	We understand that this feature is required from the mobile app, kindly confirm. Additionally it is preferable to have no local data on remote devices to ensure security and without need to wipe data on lost devices, hence we request to have remove this requirement and have the below clause that meets the need to have a seamless user experience" "The solution should have responsive web based GUI that can be accessed from any PC,workstation,Mobile, Tablet"	No Change
ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS ANNEXURE-VI - SUBMISSION OF NECESSARY TECHNICAL DETAILS Regular Updates and Enhancements	31	Provisions for regular updates and enhancements to the data analytics software to incorporate new features, improvements, and optimizations based on user feedback and evolving requirements.	We understand that the new features shall be decided basis feasibility and shall be treated as Change request over and above the current scope, kindly confirm	Yes
Eligibility Criteria - Point 3	10	The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI	If MS Fabric is considered then it is only a year old service. Can the capping on the number of years be removed. Also, is it okay to submit PO details for 3 clients with mixed industry verticals rather than only BFSI	No change
Submission of necessary technical details	29	Switch to the offline mode and still be able to use the product functionalities and all downloaded information.	Fabric solution is completely online. Are you requiring any software to be installed on the end user device that can be used offline?	Yes
Submission of necessary technical details	29	Device authorization Capture the device ID while logging in to the software to authorize the device	From technical standpoint we need to check if this is feasible with SSO	The user needs to log in on a mobile device, where SIM authentication will be performed to verify their identity.
Software Installation and Navigation	7	Software that come bundled with a mobile app (for both android and iOS) would be preferred	Is this just to view power bi dashboard in mobile app?	Yes

Hardware Requirements	34	Hardware & Software specification	Does the solution needs to be on-premise or are you ready to adopt and move to cloud? Need more clarity on this Hardware & Software specifications as to why it is required.	On-premise
General	NA	General	Kindly clarify if the team needs to be deployed onsite or offshore? Will Hybrid model work for NABARD and this project?	Hybrid
Section III Scope of Work;	6	Delivery of the Data Analytics software with licenses for approx. 2500 developers-cum-users for a period of five years.	What is the bifurcation for 2500 users? Can you break it down by number of developers, Power Users (clarify role of Power Users in the system), Only viewers, ML users?	Universal license without any user-level limitation
Section I Introduction-	6	Pre-Integrity Pact on Rs.200/- stamp paper as per the format in this bid document as given in Annexure-III.	Pre Integrity pact to be submitted Online only or hard copy needs to be sent to NABARD Office?	Scanned copy along with the bid documents; hard copy to be sent by post/ courier/ hand deliver
General	NA	General	Will the current PowerBI users be developers in the system?	Universal license without any user-level limitation
Section V	12	Only the bidders who are found technically qualified in Technical Evaluation would be considered for Proposal for Commercials.	Do we need to submit commercials along with Technical bid? Or post Technical selection?	Proposal for Commercials open for the shortlisted bidders only
Section III Scope of Work;	7	Enable users to view, annotate, and share documents, videos, and audio files	Can you let us know if the expectation is to integrate Audio and videos in the dashboard/reports/models to be built? Or how the Audio and videos are expected to be used in the software suite?	As per the revision through corrigendum
Annexure VI - Submission of Technical Details;	29	Capture the device ID while logging in to the software to authorize the device.	Capturing of Device ID is intended for the Mobile devices from which the user views the report?	Yes
Annexure VIII - DETAILS OF EXISTING POWER BI REPORTS TO BE MIGRATED	33	Need Clairifation =>	1. Visuals: Every visualization object is counted as 1 e.g. 1 bar chart is counted as 1, 1 pie chart is counted as 1, so total 2 visuals. 2. Tables: Can you please let us know, the table count stated are the source table count (tables available in the source system) or tables which are transformed/created after applying some logics to be used in the dashboards/reports.	Yes Count of tables in grid format in the visualisation is provided in the EoI document; does not refer to the count of underlying database tables Source table details shall be provided to the successful bidder
Section III		The software should provide data analytics for on-the-fly data retrieval and visualisation.	Clarify if the solution includes real-time data updates / connectors or batch updates for large datasets.	Yes
Section III		The software should support seamless interconnectivity between applications and hardware.	What specific hardware types need to be supported for integration?	Furnish your hardware requirements in the specified format
Section III		The software should include AI integration to enhance functionality.	What level of AI integration is expected? Will it include predictive analytics or natural language processing?	Predictive analytics and NLP functionality are expected
Section III		Migrate existing Power BI reports within six months from the date of issue of the contract order.	Can you provide more details on the complexity and volume of existing Power BI reports to be migrated?	Details shall be provided to the shortlisted bidders before Proposal for Commercials
Annexure VI		The software should allow administrators to manage user roles, devices, and access rights.	Does NABARD require integration with an existing IAM (Identity and Access Management) system, or should this be included in the solution?	Integration with existing IAM
Annexure VIII		Details of existing Power BI reports to be migrated	Will any existing Power BI datasets or dataflows be reused in the new environment, or will the data sources need to be completely reconfigured?	Details shall be provided to the shortlisted bidders before Proposal for Commercials
Annexure VIII		Details of existing Power BI reports to be migrated	Will there be any changes to the data warehouse architecture, or is the expectation to use the same data model from Power BI?	Same data model from Power BI
Annexure VIII		Details of existing Power BI reports to be migrated	How will security roles and access control from Power BI reports be handled in the new tool? Should they be migrated as-is, or will a new security model be adopted?	Details shall be provided to the shortlisted bidders before Proposal for Commercials
Annexure VIII		Details of existing Power BI reports to be migrated	Are there any specific performance benchmarks that must be met after migrating the Power BI reports to the new tool?	Details shall be provided to the shortlisted bidders before Proposal for Commercials
Section III	6	Provide 24/7 call and Teams/email support to resolve any issues promptly.	Is on-site support required, or will remote support suffice?	As per the revision through corrigendum
Section III	7	Delivery of the Data Analytics software with licenses for approx. 2500 developers-cum-users for a period of five years.	What are the type of users? What is the capability required by these user types. How many are viewer?	As specified in the EoI document at Page 7
Section III	7	Extract, transform, and Load (ETL) capabilities through wide options of data integration.	Do you require a separate software or inbuilt capability would be adequate.?	Separate software not required
Section III	8	Ensure secure login options and handling multiple device authorizations.	Multiple devices are interpreted as Laptop and Mobile devices?	Yes
ANNEXURE-VI	29	Online/ Offline status : Switch to the offline mode and still be able to use the product functionalities and all downloaded information.	What is the expectation of offline status? How many such reports have to be created.	Details shall be provided to the shortlisted bidders before Proposal for Commercials
ANNEXURE-VI	29	Device authorization Capture the device ID while logging in to the software to authorize the device.	User authorisation would be through Active Directory. Is deviceID capture mandatory?	Yes
ANNEXURE-VI	29	Data mining The software should be able to retrieve data from various sources like spreadsheets & flat files like Microsoft Excel, CSV, HTML, JSON, XML, text files, jpeg, jpg, etc.	Data mining, can you give more insights on this ? Is data sourcing required from JPEG, JPG file?	Refer EOI, page 29.
ANNEXURE-VI	30	Ability to generate paginated reports in excel, pdf, etc.	Is report generation in MS word mandatory?	Yes

ANNEXURE-VI	30	Ability to export dashboards/ reports to ppt format.	Is report generation in PPT format mandatory requirement?	Yes
ANNEXURE-VIII	33	AUC	What is AUC?	Analytical Use Case
ANNEXURE-VIII	33	Low Medium High	Define complexity types ? (How many DAX functions, logics and integrations done to achieve visual counts?) For Drilled reports : for 1 level drilled report would it be considered as 2 reports or 1 complex report? Count of additional reports apart from the one getting migrated?	The drilled reports have different complexity as compared to reports without drill feature so they are counted accordingly
		Delivery Model	What will be delivery model? Onsite & offshore mix possible during the project.	Onsite & offsite mix
SECTION IV – BIDDER'S ELIGIBILITY CRITERIA	10	The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI (Banking, Financial Services, and Insurance) Sector, within the past 3 Financial Years	We kindly request NABARAD to amend the clause as mentioned below: The software proposed by primary bidder should have been in industry for a minimum of 5 years and should have provided its data analytics software to at least 3 clients in BFSI (Banking, Financial Services, and Insurance) Sector / Government/ PSU/ Private Sector/ Enterprise within the past 3 Financial Years	As per the revision through corrigendum
General	-	General	We understand that the Data Analytics Software should be hosted in On-Prem. Please confirm.	Yes
ANNEXURE-VIII - DETAILS OF EXISTING POWER BI REPORTS TO BE MIGRATED	33	Details of Existing Power BI Reports – To be Migrated	Please provide the Existing data size / volume to be migrated in the proposed solution.	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
General	-	General - Data Volume	And also please provide the initial number of records/rows that will be imported into the application (All the tables put together) Total number of records/rows that the application will be holding at any given time (If NABARAD wish to store the data for long period of time)	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
SECTION-V QCBS EVALUATION CRITERIA	13	Table 1 - Scoring methodology for Technical Evaluation	We understand that the SECTION V: QCBS Evaluation Criteria applies during the RFP stage. At the current stage (EOI), bidders are required to submit their responses or documents to SECTION IV: Bidder's Eligibility Criteria and Annexures I to IX. Please confirm.	No Change
Interconnectivity and Compatibility	7	Extract, transform, and Load (ETL) capabilities through wide options of data integration.	Only limited ETL functionalities are currently supported. Could you provide clarity on the specific capabilities NABARD requirement?	As per the revision through corrigendum
Document Handling and Annotations	7	Enable users to view, annotate, and share documents, videos, and audio files. Providing dynamic navigation and annotation tools with auto-save functionality. Software should facilitate dynamic hiding of tables/ charts in reports if they do not have data.	Could you please confirm whether its for Importing or sharing audio/video files, auto-saving.	As per the revision through corrigendum
Single Sign On(SSO) integration	29	Single Sign On(SSO) to be configured using NABARD's existing SSO tools (M365).	Our solution will support if M365 supports SAML. We support both SAML or AD. Please confirm	Yes
Online/ Offline status	29	Online/ Offline status Switch to the offline mode and still be able to use the product functionalities and all downloaded information.	App will be deployed on your premises behind the firewall. It will be accessible by users via a browser who are within the network in which the app is deployed. Please provide the clarification on what is meant by online/offline mode.	Online through Mobile Application
Data mining	29	The software should be able to retrieve data from various sources like spreadsheets & flat files like Microsoft Excel, CSV, HTML, JSON, XML, text files, jpeg, jpg, etc.	We understand that "The software should be able to retrieve data from any of the various sources like spreadsheets & flat files like Microsoft Excel, CSV, HTML, JSON, XML, text files, jpeg, jpg, etc." Please provide more clarity on what file types needs to be supported to import data.	Apart from the Database sources
Data integration	29	Seamless integration with a wide range of databases, in-house applications and others.	We understand that the NABARD in-house applications support APIs. Please confirm	Yes
Export Options	30	Ability to export reports in various formats (PDF, Excel, etc.) the entire dashboard/ report, including headings, column headings etc. Ability to generate paginated reports in excel, PDF, MS Word, etc. Ability to export multiple dashboards/ reports into a single paginated pdf/ excel workbook formats with options for different page orientation for different pages; multiple options for fonts and aligning texts as also for automatic updation of 'page number index' based on the number of pages in different tabs. Ability to hide tables/ charts in reports, based on specified conditions	Please provide the required formats for exporting, as MS Word and single-paginated PDFs for reports are not supported. Additionally, could you clarify the use case for hiding reports or tables with no data?	Details shall be provided to the shortlisted bidders before Proposal for Commercials

Collaboration	30	Sharing: Options to share dashboards and reports with team members. Annotations: Ability to add comments and notes to visualizations and reports. Version Control: Track changes and maintain versions of reports and dashboards.	Need details on the use case for having version control? As the versions progress, models and workflows may change, so it would be helpful to understand the specific need for version control in this context.	The tool should have version control capabilities
General	-	General	Could you please provide the connection type that you prefer to use (Data import/Live connect)	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
General	-	General	Could you please provide the If the connection type is data import, the sync interval for scheduling the import	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
General	-	General	Could you please provide the Growth rate of the records/rows per month	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
General	-	General	Could you please provide the Initial number of records/rows, columns that will be imported into the application (All the tables put together)	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
General	-	General	Could you please provide the Total number of records/rows that the application will be holding at any given time (If they wish to store the data for long period of time)	Shortlisted bidders through technical evaluation shall be provided with further information, prior to the Proposal for Commercials
General	-	General	Could you please provide the Number of users who will approximately access the application at any given point in time (concurrently)	Approximately 10% of the number of users indicated in the EOI document
SECTION IV – BIDDER'S ELIGIBILITY CRITERIA	10	The primary bidder Original Equipment Manufacturer /System Integrator should be a company registered in India under Company Act, 1956/ 2013 or a partnership firm/ a Limited Liability Partnership company under the Limited Liability Partnership Act, 2008 with average annual turnover of ₹25 crore and above for the last three Financial Years (2021-22, 2022-23 and 2023-24)	We kindly request NABARAD to amend the clause as mentioned below: The primary bidder Original Equipment Manufacturer /System Integrator should be a company registered in India under Company Act, 1956/ 2013 or a partnership firm/ a Limited Liability Partnership company under the Limited Liability Partnership Act, 2008 with average annual turnover of ₹25 crore and above for the last three Financial Years (2020-21, 2021-22 and 2022-23 or 2021-22, 2022-23 and 2023-24)	No change
SECTION IV – BIDDER'S ELIGIBILITY CRITERIA	10	The bidder should have net profit in at least two financial years during last three audited financial years. The net worth of the Bidder should be positive as at the end of the 31 March 2024 based on the audited financial statements. A certificate to this effect duly signed by the Auditor of the bidder shall be submitted.	We kindly request NABARAD to amend the clause as mentioned below: The bidder should have net profit in at least two financial years during last three audited financial years. The net worth of the Bidder should be positive as at the end of the 31 March 2023 or 31 March 2024 based on the audited financial statements. A certificate to this effect duly signed by the Auditor of the bidder shall be submitted.	No Change
